- * reviews
- * speeches
- * statistics
- * text
- * transcripts
- * videos
- * webquests
- * worksheets

Library Webs can enhance academic performance.

Teacher Librarians

Teacher-Librarians subscribing to Library Webs no longer need to find websites for library lessons. They have more time to assist students and teachers with research, teach critical thinking skills, keep up-to-date with developing trends in library services and take a leadership role in the educational goals of their schools.

Teachers

Teachers using Library Webs are assured that their students are accessing only the best quality sites on the Web and that time is not being wasted on futile or misdirected searches. Library Webs resources can be used as a support to study units or as the central focus to a unit

of work. Special sections for teachers contain ideas for lessons plans and online activities for classroom use.

Students

Students are guided to sites which have been selected for their quality, accuracy, reliability and relevance. Students have room to explore topics broadly or to study in depth. The sites presented by Library Webs are always in context, so students are aware of how their facet of study fits into the broader framework of the subject. Students stay focused on their learning outcomes and are spared the frustration of information overload and misinformation. The quality of their assignments improves as a result.

Subscriber comments

- It is a really terrific service and I promote this database quite heavily at our school because of the quality resources you provide.
- If anyone ever asks if your product can be recommended - send them to me - I very much appreciate everything you have put together for us - Library Webs is my very favourite of all the databases we subscribe to.
- I can't believe how efficient you are!! Thank you so much - this looks perfect!
- Library Webs has been a real winner with the Year 10 History class.
- I am really impressed by the quality of the resources you offer.
- Thanks for the great service you provide.
- Now that I have been using Library Webs I cannot imagine being without it.
